

ImmunoBlend40 Colostrum + Acidophilus

ImmunoBlend40

Colostrum + Acidophilus

IMMUNOBLEND40 is a source of complete and balanced oral nutrition. Its presentation is in powder form with a delicious vanilla flavor. You can replace one of your meals a day with an Immunoblend40 shake, and you will be perfectly nourished and satisfied.

There are causes such as illness or even age that cause lack of appetite. With ImmunBlend40 we have a complete meal. Its formula allows adequate absorption of nutrients, helping our body to be full and nourished.

Main Benefits

- Helps correct nutrient absorption, preventing malnutrition and anemia.
- Helps strengthen the immune system and protect our intestine thanks to Colostrum; It also protects you from diseases such as asthma, pneumonia and diarrhea among others. Colostrum offers protection against invasions of bacteria, viruses, protozoa, fungi and other disease-causing organisms.
- Thanks to Acidophilus, it balances the patient's microbiota. It is considered a probiotic that helps increase the integrity of the intestinal mucosa, which has a direct consequence of strengthening the immune system.
- It helps strengthen the lymphatic and blood system thanks to immunoglobulin M (IgM), which is one of the main antibodies in our system and if we do not produce it we are more prone to viruses and infections.
- Thanks to the load of amino acids contained in the formula, it benefits our brain by keeping it active. It is ideal for learning and memory processes.
- Strengthens our heart thanks to Omegas, reducing triglycerides. It reduces the accumulation of plaque in the arteries to prevent them from becoming blocked and thus reduces heart risk.
- Keeps the liver protected thanks to lipoic acid, enhancing vitamins C and E.
